

Welsh Dragon Jack-o-lantern

Directions:

This is an easy difficulty design. It can be carved out or done by scraping away the outer rind and hollowing out the pumpkin to leave a thin wall of pumpkin meat in the areas in black, above.

Cut out black sections with x-acto knife and trace on pumpkin with crayon or wipe-erase marker OR

Hold stencil over pumpkin surface and poke around silhouette of black areas with pin, then remove stencil and carve sections outlined by holes.

Make your jack-o-lantern last longer by washing the inside with lemon juice to retard mold growth, then coat insides and exposed inner membrane with petroleum jelly to keep moist.
