

Castell Coch Jack-o-lantern Stencil

Directions:

This is a fairly easy design, suitable for beginners. It is better done by not actually carving out sections but scraping away the outer rind with pumpkin carving tools or a linoleum gouge and hollowing out the pumpkin to leave a thin wall of pumpkin meat in the areas in black, above.

Cut out black sections of the stencil with x-acto knife and trace on pumpkin with crayon or wipe-erase marker OR

Hold stencil over pumpkin surface and poke around silhouette of black areas with pin, then remove stencil and gouge sections outlined by holes.
