

## Welsh Dragon/Ddraig Goch Jack-o-lantern

### Directions:

**This is a more difficult design. It is better done by not actually carving out sections but scraping away the outer rind and hollowing out the pumpkin to leave a thin wall of pumpkin meat in the areas in black, above.**

**Cut out black sections with x-acto knife and trace on pumpkin with crayon or wipe-erase marker OR**

**Hold stencil over pumpkin surface and poke around silhouette of black areas with pin, then remove stencil and carve sections outlined by holes.**

**Make your jack-o-lantern last longer by washing the inside with lemon juice to retard mold growth, then coat insides and exposed inner membrane with petroleum jelly to keep moist.**
